THERE IS A PERFECT TEMPERATURE FOR EVERYTHING...

Ariston heating systems deliver quality, efficiency and innovation. We're the 3rd largest manufacturer of heating products in Europe. You can count on us for the perfect combination of cutting edge technology, elegant design and the very best service and support when you need it most.

QUALITY

We provide the highest quality heating solutions. Performance and excellence are at the heart of our products and after sales support.

EFFICIENCY

We're committed to energy efficiency and leading the way in ecodesign – our heating systems save money, and the environment.

INNOVATION

Our innovative boilers, advanced temperature control systems and accessories are at the cutting edge of heating technology.

COUNT ON US.

WHY ARISTON?

DELIVERING QUALITY, EFFICIENCY AND INNOVATION, ARISTON PRODUCTS ARE DESIGNED TO MEET THE NEEDS OF MODERN LIFE. MILLIONS OF FAMILIES AROUND THE WORLD TRUST ARISTON TO IMPROVE AND SIMPLIFY THEIR LIVES.

Thanks to this trust, we're the No. 1 manufacturer of water heaters in the world and the 3rd largest manufacturer of heating products in Europe. In addition to a wide range of intelligent boilers and water heaters, we also offer the latest renewable energy sources including solar thermal panels and heat pump water heaters.

ARE YOU READY FOR THE CHANGE?

ALL THE RESOURCES AT YOUR FINGERTIPS.

FIND YOUR COMPLETE GUIDE TO ErP ON THE ARISTON WEBSITE.

ariston.com/uk/erp

By 2020, designing and promoting the highest performance technologies will save the same amount of energy as two nations the size of Italy turning off their power simultaneously. That is a total annual energy saving of 56 million tons of oil.

ECODESIGN DIRECTIVE

Regulations will only apply to products placed on the market after 26/09/2015; those purchased before that date, and already available at sale points of distributors' warehouses, can continue to be sold and installed, even if they are not compliant with new standards, for up to 1 year.

EVERYTHING CHANGES: SEPTEMBER 2015

Starting from 26th September 2015, ErP and energy labelling regulations will be effective in Europe for heating and water heating products (boilers, heat pumps, micro-cogeneration devices, water heaters, and hot water storage tanks).

26.09.2015

Energy labelling obligation for heating and water heating products and systems.

2017

A+
Introduction for
Water Heating

2019

A+++
Introduction for
Heating Products

Minimum level of efficiency required for heating and water heating products.

New requirements on efficiency and emissions.

ERP GUIDELINES ARE SPLIT INTO TWO SECTIONS: ECODESIGN

Ecodesign sets the minimum energy performance and environment criteria for energy products.

Products must comply in order to bear a CE (C E) mark and be available for sale.

ENERGY LABELLING

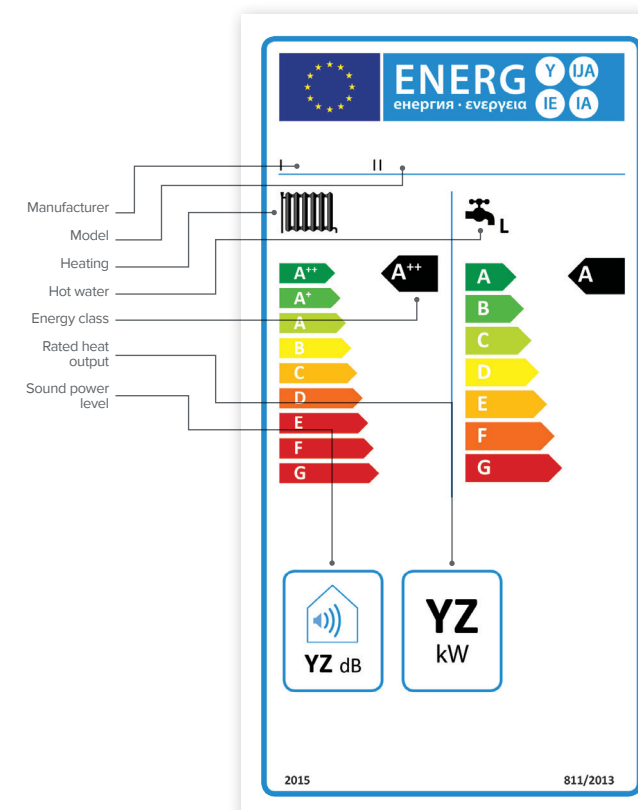

All products and systems for heating, producing and storing hot water will need to be labelled with an energy classification ranging from A++ to G.

These labels will make it easier to identify the most efficient products with A++ being the most economical products available.

THE PRODUCT ENERGY LABEL

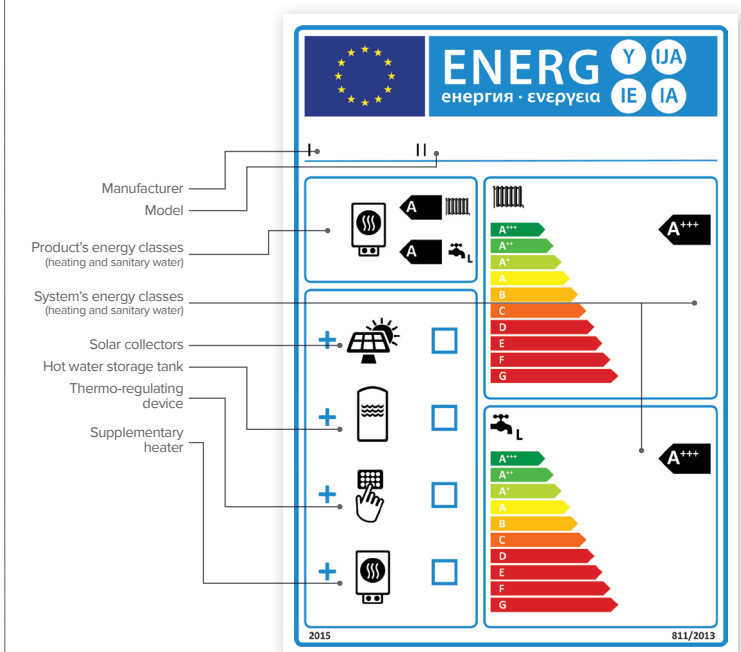

There are different labels, depending on the product's type and functions. The A, A+ and A++ efficiency classes indicate the products with the highest performances.

There are two different classifications, one for heating and one for water heating; for products doing both, the label must show both classifications.

THE SYSTEM ENERGY LABEL

All products intended to be connected in systems need to have a system (package) label, in addition to the one related to the single product. The seller of the system has to declare (through a predefined algorithm) the energy efficiency performance showed on the system label.

For more information, visit our dedicated ErP portal at ariston.com/uk/erp

THE PERFECT TEMPERATURE

OUR INNOVATIVE HEATING SOLUTIONS AND MULTI-ZONE TEMPERATURE MANAGEMENT LEADS THE WAY.

We offer complete heating solutions that can bring intelligent control, ultimate comfort and cost saving efficiencies to every home.

MULTI-ZONE SYSTEMS

THE ARISTON MULTI-ZONE SYSTEM SAVES YOUR CUSTOMERS MONEY AND CUTS CARBON EMISSIONS. USING THE SENSYS INTERFACE AND MULTI-ZONE MODULE, UP TO THREE TEMPERATURE ZONES CAN BE EASILY MANAGED INDEPENDENTLY.

2-zone diagram shown. Please contact your local Ariston representative for further information.

When a heating system consists of two or more installations that need to operate at different temperatures, the Ariston multi-zone system can save customers time, effort and wasted energy.

Consider a heating system that combines an underfloor installation with a traditional radiator installation. The underfloor installation doesn't need to operate at the higher temperatures of the radiator installation. The Sensys interface and Multi-Zone Module system controls both installations independently; conserving energy and saving money.

'AUTO' FUNCTION

THE ADVANCED ARISTON 'AUTO' FUNCTION INTELLIGENTLY MANAGES ROOM TEMPERATURE WHILE GUARANTEEING MAXIMUM ENERGY EFFICIENCY.

Pressing the 'AUTO' button on the control panel automatically instructs the boiler to choose the ideal temperature for the central heating circuit.

'AUTO' function gradually increases the system water temperature until room temperature reaches target. When used in conjunction with our extensive range of controls, the 'AUTO' function guarantees no excessive peaks in flow temperature and ensures greater levels of comfort whilst saving you money.

CONDENSING BOILER WITH AN ON/OFF ROOM THERMOSTAT

ARISTON BOILER WITH 'AUTO' FUNCTION, ROOM THERMOSTAT AND OUTDOOR SENSOR

*Compared to a standard condensing boiler

DOMESTIC evo BOILERS

Our innovative range of boilers exceeds ErP requirements. With intelligent 'AUTO' function controls, they're efficient and intelligent, helping to cut energy costs and reduce carbon emissions.

The Ariston evo range is an evolution in boiler technology, making it easy and efficient to reach and maintain the perfect temperature in the home.

Our Combi boilers offer excellent domestic hot water flow rates and provide great energy savings thanks to its intelligent technology and 'AUTO' function option.

The Ariston heating range makes it easier than ever to reach, maintain and control the ideal temperature.

Ariston regular boilers are small but mighty, providing advanced heating power even when space is limited whilst offering the quality, innovation and excellent performance you would expect from an Ariston product.

Combine our boiler range with Ariston's own range of controls to boost energy efficiency and cost savings.

Count on us for the perfect combination of cutting edge technology, elegant Italian design and complete peace of mind.

KEY FEATURES

Here's why our Ariston boilers are the installers' choice:

- 'AUTO' function for optimum efficiency
- Compact dimensions
- 2, 5, 8 and 12 year warranties available
- Easy installation
- Kiwa approved
- LPG conversion kits included
- ErP compliant high efficiency pump

CHOOSING THE RIGHT BOILER

WHICH TYPES OF BOILER ARE AVAILABLE?

COMBI

ADVANTAGES OF A COMBI

- Space-saving as there is no need for a hot water cylinder or a header tank
- Can be cheaper to install than (replacing) a regular/system boiler and cylinder
- Instant hot water which is unlimited up to the maximum flow rate of the boiler
- Water comes straight from the mains and therefore less like to suffer from loss of pressure

SYSTEM

ADVANTAGES OF A SYSTEM

- No need for a cold water storage tank and therefore saving space compared to a regular boiler (but still need a cylinder for hot water)
- Separate cylinder which allows water to be provided to multiple taps simultaneously
- Ideal for homes with a large demand for hot water

REGULAR

ADVANTAGES OF A REGULAR

- Requires a separate hot water cylinder which then allows the use of multiple taps simultaneously
- Usually smaller units which operate more quietly
- Ideal for homes with a low mains pressure and space in the loft
- Many traditional homes use a regular/open vented heating system and so replacement can be less costly

HOW DOES THIS AFFECT MY HOT WATER?

COMBI = INSTANT HOT WATER

- Water is only heated when needed (no payment for un-used water/storage of water)
- Hot water is available instantly (up to maximum flow rate of boiler)
- Often cheaper to install than a stored hot water system
- No stored water means no chance of harmful bacteria growing

SYSTEM/REGULAR = STORED HOT WATER

- Can combine with renewable energy sources such as solar panels in conjunction with solar cylinders
- Emergency back-up immersion heater can be used if the boiler fails so hot water is always available (once heated)
- Can deal with high levels of demand by buying the appropriately sized cylinder for a household

CHOOSING AN ARISTON BOILER

IN ALL SPECIFICATION, CHOOSING AND INSTALLING A NEW BOILER SHOULD INVOLVE A PROFESSIONAL TO ADVISE ON THE BEST SUITED SYSTEMS FOR SPECIFIC HEATING AND HOT-WATER DEMANDS.

Ariston manufactures all three types of gas boiler with excellent warranty options, as well as cylinders, water heaters and smart controls to ensure optimum efficiency whilst maintaining a high level of comfort in the home.

DIMENSIONS

E-COMBI evo

24 30 38

**A HIGH EFFICIENCY GAS COMBI BOILER
DESIGNED FOR EASY INSTALLATION.**

The stylish and compact E-COMBI evo brings quality, performance and reliability. Endorsed by the Energy Saving Trust this innovative boiler with advanced 'AUTO' function can help cut energy costs and reduce carbon emissions.

The user-friendly interface has a backlit LCD display, pressure gauge, time clock and intuitive button layout.

KEY FEATURES

Here's why our combi boilers are the installers' choice:

- Output range from 24 to 38kW
- 'AUTO' function technology
- No hot water cylinder requirements
- Stainless steel heat exchanger
- Built in automatic by-pass
- LPG conversion kit as standard
- Auto-diagnostic system
- Anti-frost and anti-scale device
- Connection kit and filling loop
- High hot water flow rates
- Range of wired and wireless controls available
- Three temperature zone capability when used with Sensys controller
- 'A' ErP rated for energy efficiency

OUR REFERENCE	PRODUCT CODE	DESCRIPTION	CH Output (kW)	DHW flow (l/min) @ΔT 35°C

CHOOSING THE RIGHT CONTROLS

Our range of intelligent controls and multi-zone temperature management bring cost saving efficiencies and comfort to every home. For ultimate temperature and efficiency management, the Sensys system interface offers an easy-to-use heating control centre. For home or space specific needs, Ariston offers a range of singular controls to complement and customise our heating solutions.

Sensys is the controller which will control your complete heating system. Working with other products in the Ariston portfolio, comfort and energy saving go hand-in-hand.

ROOM SENSOR

Works as a slave for Sensys to zone your home and only heat the zone you need heating.

OUTDOOR SENSOR

Enables the boiler to compensate for the external temperature.

CLAS HE evo BOILER

Use the 'AUTO' function to add further cost and energy savings of over 6%.

MULTI-ZONE MODULE

Use with Sensys and Room Sensor to manage multiple heat zones.

ARISTON CYLINDERS

Sensys also controls the timing of your hot water.

SENSYS SYSTEM INTERFACE

Achieve 6% energy savings when using the 'Auto' Function with Sensys and an Ariston Outdoor Sensor

MODULATING ROOM SENSOR

- Compatible with all 'evo' boilers
- Used as a slave modulating room sensor with Sensys control unit and multi-zone module for zoning and accuracy
- Anti-Freeze function which starts the boiler at 5°C to prevent freezing of the boiler

ROOM THERMOSTAT

- Compatible with all Ariston boilers
- Sets the desired temperature for the home
- Simple operation

OUTDOOR SENSOR

- Compensates for external temperature fluctuations
- Easy installation
- Compatible with all 'evo' boilers

PROGRAMMABLE ROOM THERMOSTAT (RF)

- Compatible with all 'evo' boilers
- Night set back mode for setting a lower temperature at night from the daytime
- Receiver comes pre-paired with the control for ease and speed of installation

COMMERCIAL BOILERS

Ariston boilers bring quality, innovation and reliability to commercial settings. Our boilers are compact and intuitive, making installation easy and hassle free.

With two-zone temperature management capability and modulating climatic thermoregulation, Ariston commercial boilers can cut energy costs and reduce carbon emissions.

KEY FEATURES

Here's why our commercial boilers are market-leading:

- Compact dimensions
- Easy installation
- Energy efficient
- 'AUTO' function for optimum efficiency
- Two temperature zone management
- Quiet operation
- 2 year warranty

COUNT ON US... FOR HOT WATER

Ariston is the world’s leading manufacturer of water heating. With a range offering 5 litre electric water heaters to solar powered 300 litre unvented cylinders, we supply the most advanced products on the market, whatever your requirements.

We are the UK market leaders in enameled unvented cylinders. With a 25 year warranty, the Classico range provides optimum reliability thanks to magnesium anode protection.

Developing the technology of our market leading Europrisma range, our sophisticated new design encases an evolution in water heating. Say goodbye to the Europrisma – and hello to the **Andris Lux**.

Visit www.ariston.com/uk/Electric_Water_Heaters for more information on our hot water range.

COUNT ON US... FOR RENEWABLES

Ariston solar panels, pump stations, controllers and cylinders offer a complete solar thermal energy package from a single source.

Our Nuos heat pump water heaters are an eco-friendly alternative to electric hot water heaters, providing an innovative solution for properties off the gas grid.

With flat and on-tile solar panels, we’ve made it easier to make any property more eco-friendly. As the heat pump on the Nuos is combined with the cylinder, installers only need G3 rather than F-Gas qualifications.

In addition, you can count on us for continuous practical training, technical support and genuine parts whenever you need.

Visit www.ariston.com/uk/Solar_Thermal for more information on our renewables range.

ARISTON ACADEMY

Training that gives you more.

HANDS-ON, PRACTICAL AND REWARDING, OUR ARISTON ACADEMY PROVIDES YOU WITH THE KNOWLEDGE AND SUPPORT ON THE LATEST TECHNOLOGIES.

Providing comprehensive training for installers and merchants, our nationwide academies offer valuable hands on experience with live gas and water connections.

Providing you with all the skills you need for fast, trouble-free installation and servicing, trainees will also receive a fully comprehensive training pack with all the information needed to sell and install our products. In addition to benefiting from giveaways as well as an ‘accredited installer’ vinyl and certificate, trainees will also receive £300* boiler cash back upon completion of the course.

Our courses are delivered in a relaxed and friendly atmosphere by expert trainers with the knowledge and experience to help you succeed.

TRAINING COURSES COVER

- Our technology and how it works
- Installation of Ariston products
- Mechanical operation
- Intuitive controls and how they simplify installation commissioning and servicing
- Electrical circuits and components
- Hydraulic circuits and components
- Practical ‘hands-on’ experience
- Use of fault codes and diagnostic techniques

ARISTON ACADEMIES:

CUSTOMER CARE & QUALITY

OUR WORLD-CLASS MANUFACTURING CAPACITY, TOGETHER WITH OUR SPECIALIST ARISTON SERVICE TEAM, OFFERS OUR CUSTOMERS AN OPTIMAL COMBINATION OF COMFORT, ENERGY EFFICIENCY AND RESPECT FOR THE ENVIRONMENT.

RESEARCH & DEVELOPMENT

Ariston employs over 260 people in 17 centres across the globe for product research and development. We have made environmentally friendly energy efficiency integral to our operations. By 2020, Ariston aims to carry out 80% of its business with high-efficiency or renewable energy solutions. Our ability to combine energy efficiency, innovation and design, is contributing to shape the future of thermic comfort.

**DESIGNED IN ITALY,
READY FOR THE WORLD**

STRIVING FOR EXCELLENCE

Our goal is to ensure our customers' satisfaction, understanding their needs and continually exceeding their expectations. Our focus on quality does not stop at the design and manufacturing of our products, it extends equally to the development of internal talent, the training of professionals and the relentless improvement of our business processes.

Ariston implements the World Class Manufacturing (WCM) method in its plants to constantly improve manufacturing performance as well as ensuring product quality and maximum flexibility in meeting customers' demands.

24/7 CUSTOMER SERVICE

Our specialist support and service provides a team of highly skilled experts on hand to offer advice and assistance, wherever you are, whenever you need it.

Specialists in our product areas, there will always be a point of contact available to deal with anything from arranging a service, warranty issues or scheduling a visit from an engineer.

With the knowledge an Ariston expert can answer your call within 20 seconds, you can rest assured that you can count on us 24 hours a day, 7 days a week.
